

Oracle MS Case Study

Springfield Youth Club

Oracle Managed Services was tasked by Springfield Youth Club (Hackney), with project management of various alterations to their building & its internal environment.

The project deliverables included:

- Fixed wire testing & inspection
- Kitchen alterations – removal of partitions & forming new kitchen walls; supply & installation of kitchen fittings
- External fabric repairs – guttering & repairing missing tiles
- A new illuminated sign
- Lighting in office & main areas
- Installation of new energy efficient heaters
- Repair & replacement of external roof
- Gym refurbishment
- Refit of two washrooms – both to be gutted & installed with new equipment

Oracle MS Case Study

A range of highly skilled electricians, plumbers, site managers & engineers were employed to carry out the works at the Springfield Youth Centre. Oracle Managed Services made sure that all elements of health & safety were carried out to ISO quality, whilst the project was underway. Keeping in mind that time and budget were also a high priority.

The project was carried out over a 6-month period, due to delicate site constraints that couldn't be overlooked & were incorporated into the original lead time.

Oracle Managed Services took every step to make sure this project was a success and the client was left happy. Our dedication to smaller details, where other companies might overlook, impressed the client. The project was overall a success and is now another great addition to our portfolio.

Cost: £75,000

Duration: 6 months
