

Oracle MS Case Study

Washroom Refurbishment Central London

BAM FM tasked Oracle Managed Services with the refurbishment of multiple washrooms in Victoria Place Shopping Centre. An extensive renovation that was given a 6 week lead time for completion.

The project deliverables included:

- To deliver four washrooms – male (small & large), female & disabled
- 1 cubicle & 2 urinal's – small male washroom
- 8 urinals 2 cubicles – large
- 6 cubicles - female washrooms
- 1 fully fitted disabled access wash-room – full access

The project involved a full rip out, to shell core and core. All pipework was to be replaced in the washrooms. Soil stacks cleaned and jetted. Each room to be plastered and new tiling installed. New lino flooring to be fitted. New toilets, hand basins & cubicle doors for each room (where applicable).

Oracle Managed Services main job was to ensure the washroom fit-out was a success. Using our team of multi skilled engineers and project managers, this was successfully completed.

Oracle MS Case Study

Like with every job Oracle takes on, our two main priorities were to be on time and on budget. The install at Victoria was no exception to the rule. Using successful management implementation, we were able to additionally deliver on time within our 6 week deadline.

Client comments:

"Oracle MS took great measures to ensure the success of this project. Their performance exceeded regular expectations, by delivering the contract within budget and on time. We were impressed by their overall dedication to the project"

Cost: £58,000

Duration: 6 weeks
